- **Responsive design, mobile-friendly and optimized for all devices** to deliver seamless user experiences.

Dear Hiring Manager,

I'm excited to apply for the **Web Design & Development Specialist** role at your company. Over the past decade, I've built websites that are not only visually engaging but also technically robust — designed to perform seamlessly across devices and optimized for growth.

My core expertise lies in **WordPress (Elementor)** and **PHP development**, but I also bring strong skills in **web-hosting, cloud-hosting, VPS-hosting, and cPanel configurations**. This means I can manage the full lifecycle of a project — from design and development to deployment and hosting management — ensuring clients have reliable, secure, and scalable platforms.

Highlights of my experience

- Developing **mobile-friendly, responsive websites** tailored for industries such as e-commerce, travel, medical, education, and digital agencies.
- Designing graphics and layouts with **Photoshop** and **Canva** to create compelling user experiences.
- Implementing SEO strategies using **SEMrush** and other tools to boost visibility and rankings.
- Configuring **hosting environments** (shared, cloud, VPS) and managing **cPanel setups** for smooth deployment and maintenance.
- Delivering multilingual solutions, supported by my fluency in **English, Tamil, Sinhala** (Basic Spoken), **Arabic** (Spoken), **Hindi**, and **Malayalam** (Basic Spoken).

At **Discovered You (2019–2025)**, I led projects that improved client engagement and online presence, while my long tenure at **KFIP in Saudi Arabia (2000–2018)** gave me deep experience in enterprise-level web solutions and IT support. These roles taught me how to balance creativity with technical precision, and how to deliver solutions that scale.

I would love the opportunity to bring this combination of design, development, and hosting expertise to your team.

Thank you for considering my application

I look forward to discussing how I can contribute to your company's digital success.

Warm regards,

Jeganathan Ragulan
